<b>Code</b>	KA 80486
<b>Programme</b>	Support of University Professors and Researchers
<b>Funding Bodies</b>	Hellenic Foundation for Research and Innovation [ELIDEK]
<b>Total budget</b>	198.601,20
<b>Duration</b>	24/01/2020 – 08/01/2024 [48 months]
<b>Host Institution</b>	University of the Peloponnese
	Aristotle University of Thessaloniki                      University of Antwerp                      Université Rennes 2

- Eleni Papalexioi, associate professor – Department of Theatre Studies, University of the Peloponnese
- Dio Kangelari, assistant professor – Theatre Department, Aristotle University of Thessaloniki
- Avra Xepapadakou, associate professor, University of Nicosia
- Luk Van den Dries, professor emeritus of Theatre Studies, Universiteit Antwerpen
- Sophie Lucet, professor of Theatre Studies, Université Rennes 2
- Marina Nastou, Ph.D. candidate, research associate
- Valia Vraka, Ph.D. candidate, research associate
- Paraskevi Damala, research associate
- Elpida Komianou, research associate
- Evangelia Chelioti, research associate
- Sofia Niaounaki, research associate
- Nikos Nikolopoulos, film maker
- Stathis Athanasiou, film maker

Romeo Castellucci

Dimitris Papaioannou

The research project ‘Genesis’: Genetic Research & Digital Visualization in the Performing Arts aims to conduct primary research in the domain of the performing arts, and more specifically in the genetic analysis of performance and the digital visualization of the creative process. Genetic analysis has to do with the study of all the stages of the creative process, from initial conception up to completion on stage. It focuses on the gradual realization of dramatic and scenic composition, on the creators’ elaboration of dramatic material, the identification and comprehension of the theoretical background of artistic thought and of artists’ sources and references, the study of the process of rehearsal, the training of actors, the management of space, stage, costumes, lighting, production, etc. The genetic approach of stage creation is nowadays considered a necessary presupposition for the scientific analysis and interpretation of a performance.

The project is based on the rich and complex work of two internationally acclaimed stage directors, Romeo Castellucci and Dimitris Papaioannou.
